

Institutional Distinctiveness 2018 – 19

The aspiration of our students' personality development and capacity building is our distinct dream. To prioritize that goal we have enlisted many activities of which three special activities we could do during the year 2018-19, namely expert lecture series, basic computer literacy, and activities for value addition among the students.

Expert Lectures:

The purpose behind this activity was to enhance the general understanding of the students in their subjects. There were seven such lectures delivered during the year, covering each subject taught in the institution (Gujarati, Sanskrit, English, Economics, Sociology, psychology, and Commerce). The management of the college has given freehand to all the heads of the department to invite such scholars from various locations of Gujarat. The experts talked on general topics of the subjects and the opportunities available to the students by offering any particular subject.

Basic Computer Literacy:

The institution has signed an MoU with C-DAC (an institution providing software and hardware solutions to corporate world) to provide operational knowledge of computers to our students. During the year 150 students (30 students from each department) developed their computer skills.

Activities for Value Addition:

To inculcate the human values in the students we do value addition activities; it is two folded: (1) to commemorate great persons of the nation, we celebrate their birth anniversary or death anniversary. (2) To teach the students various courses through which values are imbibed in them. By learning these courses they learn about personal, national or social values; 16 such courses were offered during the year. The list of the courses is given here in tabular format.
